

ABSTRACT

A method for securely downloading files from a database to a managed device that includes selecting a managed device; affixing a unique identification number to the device; creating a file for the managed device on a database, wherein the file can be downloaded over the Internet; creating an access verification program for downloading the file which permits a user of the managed device to access and download the file over the Internet for a period of time; reading the unique identification number by the user; entering the unique identification number into the access verification program by the user; verifying the unique identification number using the access verification program; permitting access to the database by the user for downloading the file for a period of time; downloading the file from the database to the managed device; and blocking access to the database for downloading the file.
